Cathedral Sr. Sec School, Lucknow	**2017 - 2018**

Secondary(10th) - CBSE — Percentage : 96

About

I am a results-oriented professional with a deep commitment to excellence. With a background in development and management, I bring a robust foundation of technical and non-technical skills, coupled with a fervor for innovative projects and development. My prowess shines in dynamic environments, where I demonstrate unwavering dedication to continuous learning and a relentless drive to leave a lasting impact in my chosen field.

Projects

TourIndia

Developed and implemented the Tourism India web application, enabling travelers to plan their trips to India by customizing their preferences and generating personalized travel reports.

Pioneered the integration of crucial safety features, including an SOS function, within the application to enhance the safety and security of travelers, addressing rising concerns about traveler well-being.

LNMshop

I contributed to the development of LNMshop, an on-campus project for LNMIIT students, focusing on creating a platform for convenient purchases, carpooling, and recycling.

Played a role in implementing features for transportation coordination and recycling promotion within LNMshop, with an emphasis on development and enhancing campus life.

ENS - Domain | *Blockchain Project*

I was instrumental in developing and managing the Ethereum Naming Service on Ethereum (ETH), simplifying the acquisition and management of Ethereum-based domain names.

Focused on optimizing the user experience, enhancing security, and fostering a vibrant environment within the Ethereum ecosystem.
